### COVID - 19 European Championships Munich 2022 Statement

The overall situation regarding Covid-19 in Germany has improved significantly with the part of the local authorities and lawmakers having lifted many of the preventative measures adopted to curb the spread of the virus. In particular, many restrictions were dropped in Germany as of April 1<sup>st</sup>, 2022. Most importantly, the 2G/3G regulation will no longer be maintained, so there is currently no control of vaccination or recovered status on the part of European Championships Munich 2022.

For the currently valid entry regulations to Germany, please refer to the latest info on available on the website of the Federal Ministry of Health <https://www.bundesgesundheitsministerium.de/coronavirus.html>.

Nevertheless, to ensure a safe event for all persons involved, the following recommendations and guidelines to every accredited participant of the event are in place:

- A minimum distance of 1.50m should be maintained wherever/whenever possible. Hygiene measures should be always observed. These include frequent and thorough hand-washing and coughing and sneezing into the crook of the arm or into a paper handkerchief.
- Especially indoors or when a distance of 1.50m from others cannot be maintained, medical mouth-nose protection or an FFP2 mask **must** be worn. Masks will be kept ready and provided at entrances.
- The above obligation also applies to local transportation with the event shuttles and is recommended for any other international or local transportation
- Persons wishing to undergo voluntary rapid antigen testing (PoC) will be provided with testing stations at selected locations to be communicated later.  
Persons with a confirmed SARS Cov-2 infection will not be allowed access to the sports venues and will be required to go into isolation.

### Medical Study

Injury and illness prevention, led by the International Olympic Committee, has been at the center of the efforts of many international sports Federations for several years. To this end, injury and illness surveillance studies have been conducted at major championships, including the Olympic Games, to determine the frequency and characteristics of injuries and illnesses during these competitions.

The Munich 2022 European Championships organising committee has decided to expand this knowledge during the Championships, by documenting injuries and illnesses that occurred during training and competition. A study team will record the sport, gender, age, region of injury, mechanism of injury, and possible suspected diagnosis. This will be done anonymously and will not delay the treatment of athletes. For further questions our study team will be at the medical area and will be pleased to inform you in person.

Furthermore, this study aims to analyse the potential health problems of athletes in the months before the Championships and their possible connection with injuries and illnesses during the event, as well as the perception of injury prevention and prediction, menstruation in women through anonymous online questionnaires. These questionnaires will be advertised as a poster and will be accessible via QR code. Athletes can personally decide if they want to support the survey and contribute to the improvement of injury prevention and the understanding of injuries.
